Director Sustainable Transport

DRIVING THE SHIFT TOWARDS A SUSTAINABLE TRANSPORT SYSTEM

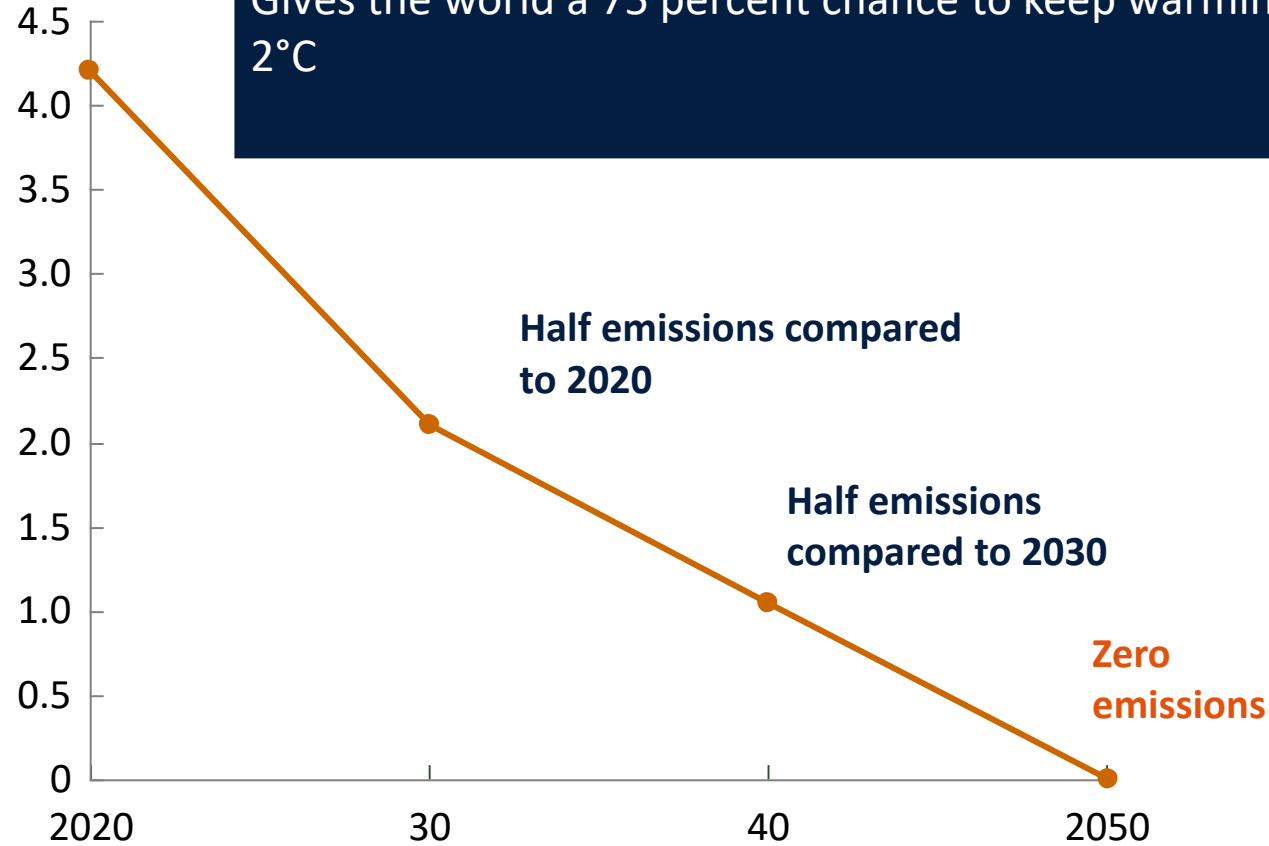

SCANIA

The global carbon law applied to transport

Fossil fuel emissions should peak by 2020 and reach zero around 2050
Gives the world a 75 percent chance to keep warming below 2°C

GtCO₂/yr
from trucks
and buses

The pathways study

Three segments

Long haul

Distribution

City bus

Four countries

Sweden

Germany

USA

China

Four scenarios

Battery electric growth

Biofuels growth

Fuel Cell growth

Tech mix

5%, Biofuel
15%, FCEV

Scania's approach to sustainable transport

Energy efficiency

Alternative fuels
and electrification

Smart and safe transport

SCANIA
