THINK. Elbil med utspring i Norge. Foto: ESPEN BRAATA

- Norge skal bli ledende i verden på elbil

Senterpartiet vil jobbe for at en femdel av bilparken i Norge skal bestå av elbiler innen 2015.

The Norwegian EV incentives

«The Resistance»

The production of batteries are heavily polluting

EVs polute more than diesel cars

The incentives costs 50 billions a year

Disbels the buses in the bus line

Subsidies of the upper middel class

The EV's will make it impossible to get enough renewable energy

Energy consuming luxury cars

The incentives are exaggerated

LCA

My neighbor have an EV, I can't afford it

Where are the (r)EVolution off to next?

Electric hybrids

Electric
