

NORSK E-FUEL

To make transportation renewable

2020

Karl Hauptmeier

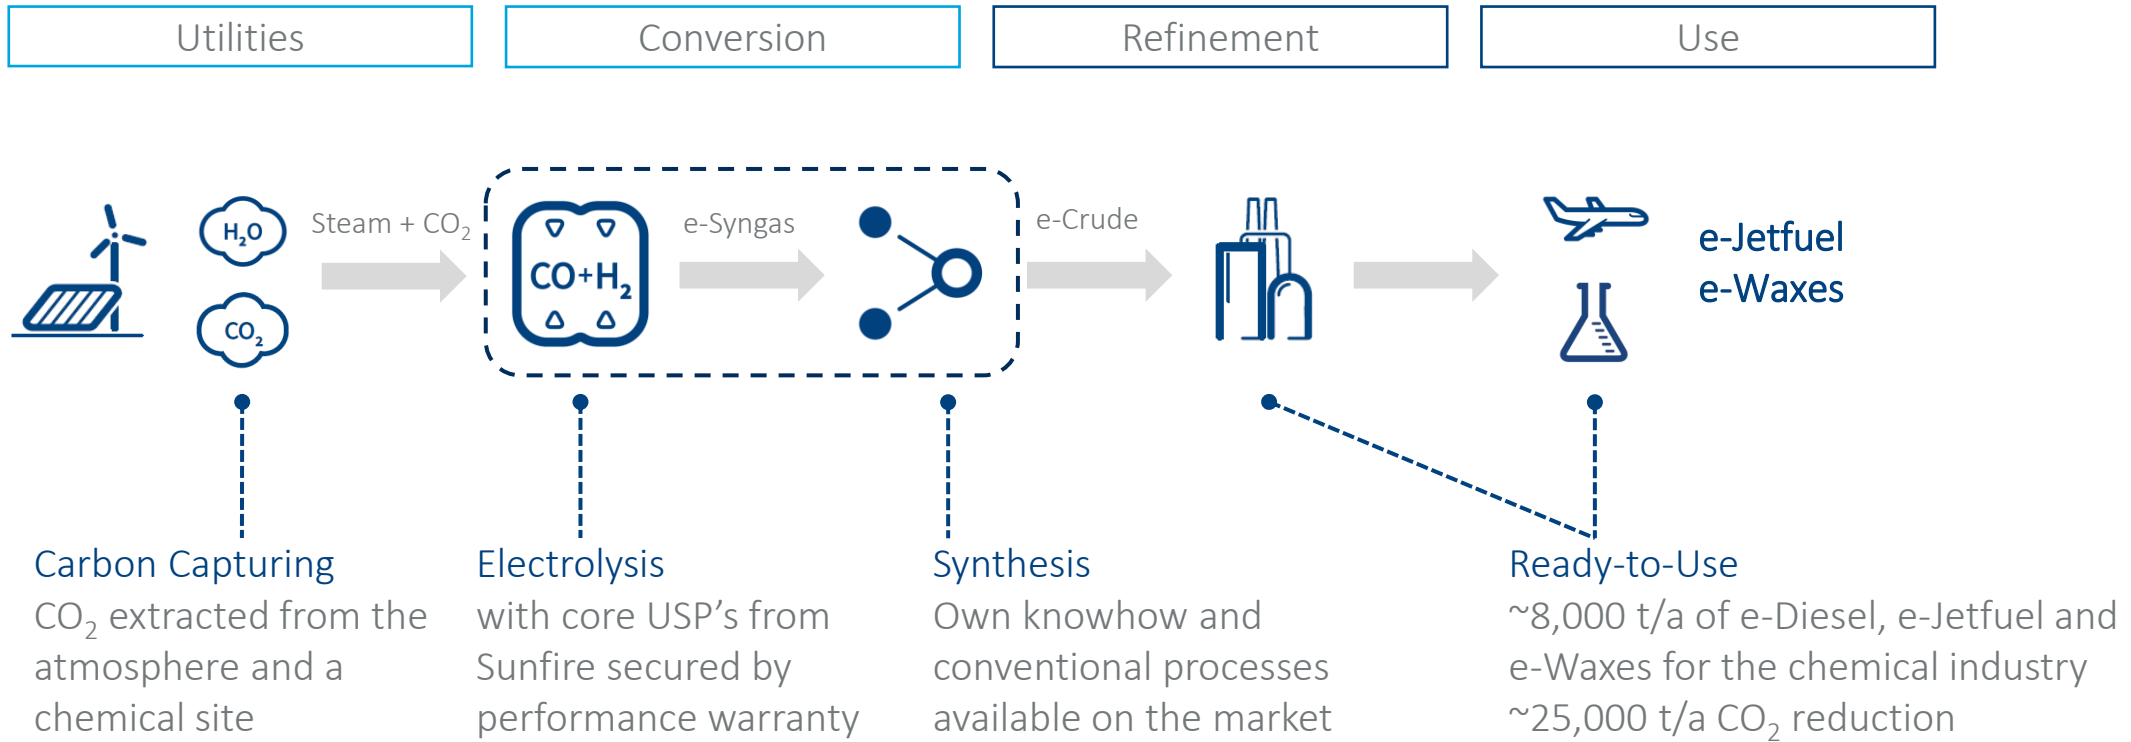

THE NORSK E-FUEL PROJECT

- Norsk e-Fuel will realize a series of e-Fuel projects with integrated, standardized plant lay-out and performance warranty
- The goal: Industrializing PtL technology in Norway for the European Market.
- Strong project consortium with world leading partners in the respective fields of plant-EPC, project development, Direct Air Capture of CO₂ and PtL via Electrolysis
- Proprietary technology and world-wide patents: Norsk e-Fuel offers the most efficient and economic PtL pathway coupled with corporate strength to execute

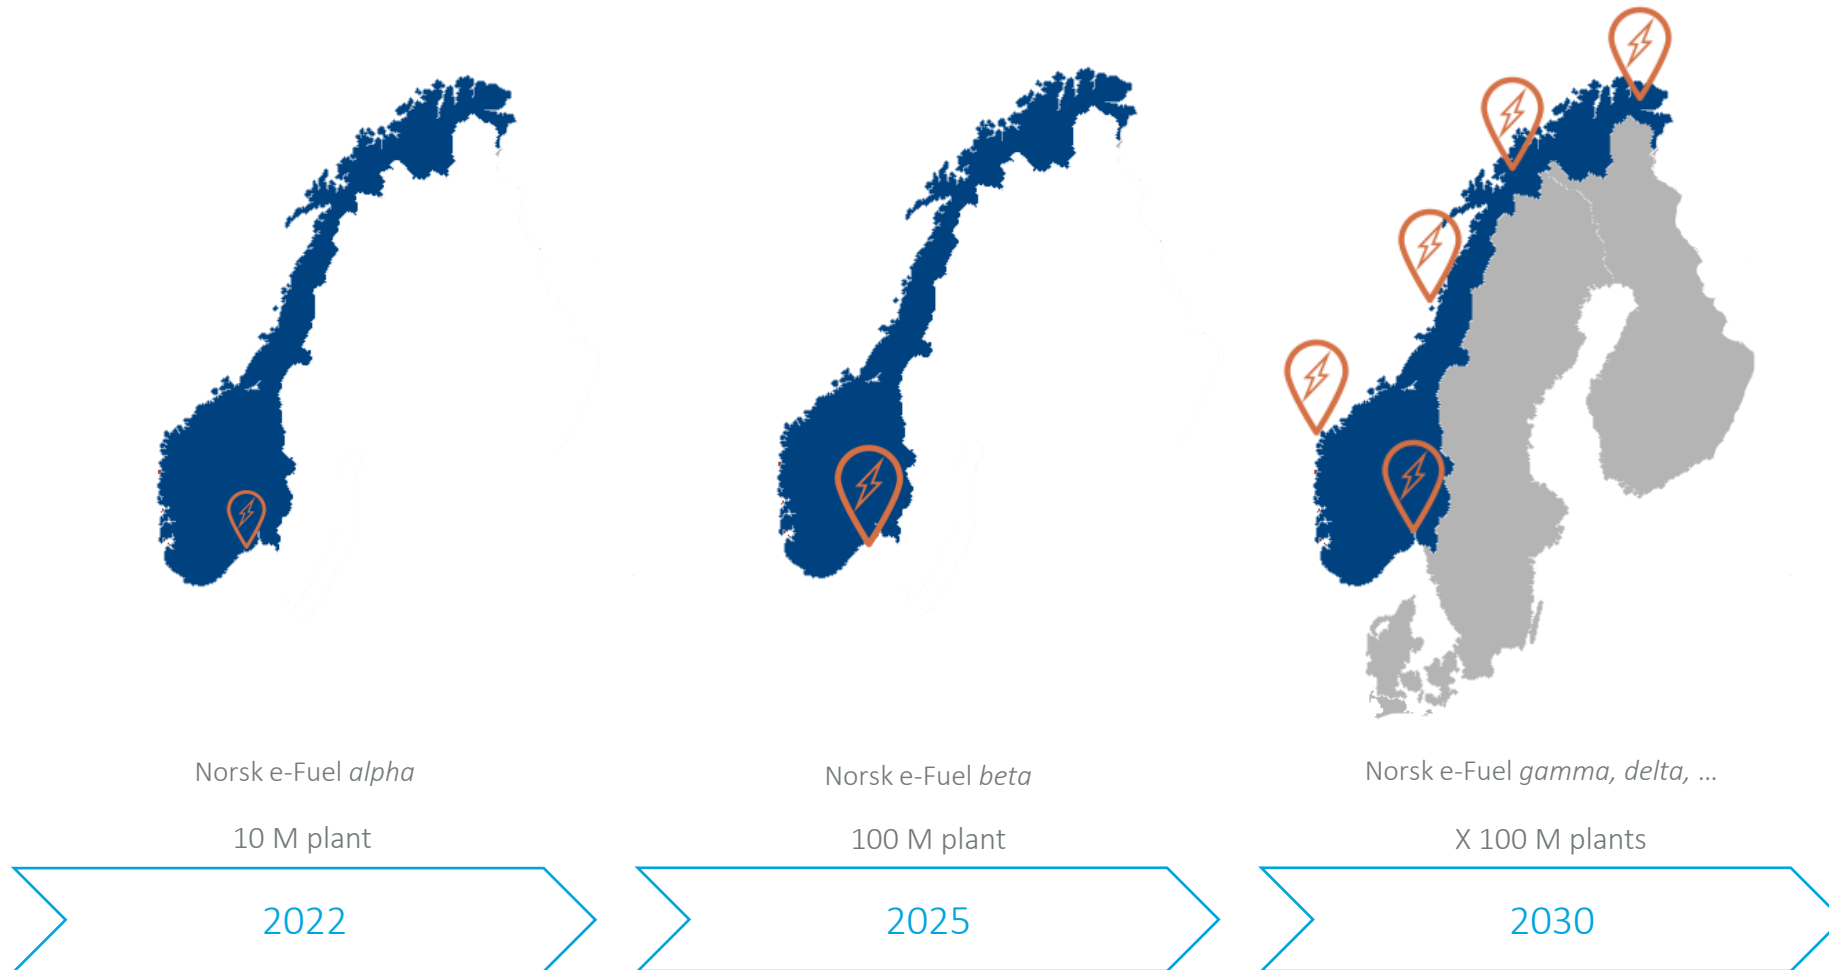

THE NORSK E-FUEL PROCESS

POWERED BY SUNFIRE & CLIMEWORKS TECHNOLOGIES

- Worldwide process patent gives competitive advantage.
- Integrated subsystems ensure high efficiency

NORSK E-FUEL POTENTIAL
